-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Claims 1-12 are pending with claims 9-12 withdrawn from consideration. Applicant's election with traverse of Group I, claims 1-8, in the reply filed on 24 June 2004 is acknowledged. The traversal is on the ground(s) that sequences {4} and {5} are structurally and functionally similar. This is not found persuasive because although the sequences are described as being on the inner ring of the AK38 active site and are primarily responsible for the anti-angiogenic activity, the sequences are structurally different. Given the structural differences of the two sequences, each could stand alone as a separate invention. Given such structural differences, there would be need for multiple searches that would not be necessarily inclusive of one another.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-2 and 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Kundu *et al.* (WO 99/36784). Kundu *et al.* teaches a sequence that comprises the anti-angiogenic functionality of the structure of sequence {4} (see SEQ ID NO: 1).

Art Unit: 1654

4. Claims 1-2 and 5-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Kundu *et al.* (US Patent No. 6,210,906 B1). Kundu *et al.* teaches a sequence that comprises the anti-angiogenic functionality of the structure of sequence {4} (see SEQ ID NO: 1).

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 3-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. Claims 3-4 and 7-8 are rejected for depending from rejected claims.

Claim Objections

8. Claim 1 is objected to because of the following informalities: claim 1 recites sequences that lack proper sequence identifiers, i.e., SEQ ID NO:. Appropriate correction is required.

Conclusion

No claims are allowed.
